

Instruction at Herndon Middle School

2019-2020

Our focus on literacy and the workshop model will continue for 2019-2020. All teachers and CLTs will continue to implement the workshop model, including Reader's and Writer's Workshop and Math Workshop. We will work towards more engagement on learning tasks that promote higher level thinking and student discourse.

SIIP & Professional Development Focus

Focus	Unity & Positive School Culture	Closing Achievement Gaps	Literacy
How	P2 and PBIS	Targeted Small Group Instruction	Improving Learning Tasks and Student Discourse
Description	We will continue to promote consistency, cultural sensitivity, and positive student and staff relationships in classrooms as well as all areas of the school. We will emphasize consistency across classrooms and provide professional development in classroom management to increase student engagement and accountability.	CLTs will use ongoing formative assessments to plan remediation for students through conferences and small groups. We will reteach and reassess during class. Frequent progress monitoring will be expected. Professional development will focus on creating conditions in classrooms to ensure structures and routines are in place and students know the expectations for worktime and small group instruction.	In all classrooms, we will engage students in authentic learning tasks which promote meaningful discourse around the content. Professional development will focus on increasing our capacity in these two areas.
